

Peer groups

CHEN4011: Advanced modeling and control S2 2025

Ranjeet Utikar

2025-07-27

For this unit, you will be working in pairs (peer pair) or in groups of four (two companion pairs). You will work with your pair buddy/ group member for lectures, workshops, and labs. However, you would be free to choose your project partners (project is supposed to be done in a group of 4).

I have tried to use the information you have provided to create pairs. You might be paired with someone whom you already know or someone who you will work with for the first time. If you have any legitimate concerns/ issues with the pair/ group please get in touch with me.

The peer groups for semester 2, 2025 are as follows:

Group ID	Partner group	Members
1	2	Josh, Thanh Tu
2	1	Milan, Lauren
3	4	Argyanti, Vesa
4	3	Lucy, Ben S
5	6	Fred, Max
6	5	Noah, Nada
7	8	Willem, Maansi
8	7	Jenny, Jerome
9	10	Joshua, Jack
10	9	Khanh Van, Jesse
11	9,10	Ben M

Some considerations:

1. If your pair/ buddy is present, join them for the lecture, lab.
2. if your pair/ buddy is absent, join your companion pair for lecture, workshop, lab.
3. If your pair/ companion pair buddies are absent, you are free to regroup with others.
4. Make sure that your companion pair and you sit at adjacent computers.
